

# intimus TSI-4G

## Versatile Folder inserter

The intimus TSI-4G is a compact yet highly capable folding and inserting system designed to streamline your daily mail operations.

### User Friendly operation

Designed for ease of use, the system features a 7-inch full-color high-resolution touchscreen with a wizard-based interface. This intuitive navigation allows any user to quickly select, set up, and run folding and inserting jobs with confidence. The TSI-4G efficiently processes a wide range of mail types—from direct marketing campaigns and invoices to monthly statements and transactional documents. Its exceptionally quiet operation makes it ideal for any office or production environment.

### Maximum Flexibility

Thanks to the exclusive FlexFeed® tray system, the intimus TSI-4G can handle virtually any document size or type without complex adjustments. Combined with a semi-automatic envelope separation mechanism, the system delivers reliable feeding performance and full operational flexibility. The optional MaxiFeeder further enhances productivity by accommodating up to 325 business reply envelopes, making it perfect for high-volume response handling. Optional choice from different output options like a high capacity vertical stacker or frontal catch tray.

### Easy and precise

The semi-automatic envelope feeder allows fast configuration, with a locking mechanism that maintains precise settings and safeguards against accidental modifications.

### Visible insertion area

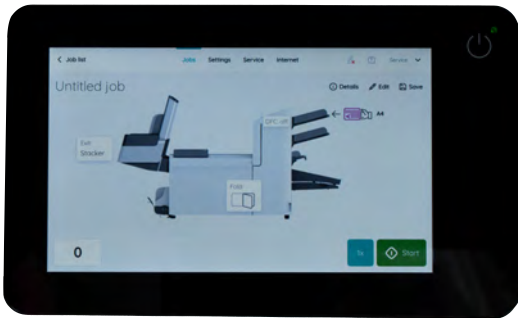

The viewing window in the top cover ensures continuous visual control of the insertion process, allowing timely intervention and optimal performance.

### Comfort first

A convenient document holder positioned on top of the tower enables easy and efficient handling of documents, making it ideal for processing daily mail jobs.

### 7" Color Touch screen

The 7" graphical touchscreen is designed for simple and efficient operation. Stored applications can be accessed quickly, reducing setup time and improving productivity. A user-friendly step-by-step wizard guides operators through the setup process, allowing job settings to be easily configured and saved in memory for fast and reliable job recall.

### Maximum Accessibility

The system is designed with a practical clamshell architecture that provides full, unobstructed access to the entire paper path. By simply opening the top section, operators can easily reach all critical areas for loading, inspection, cleaning, or clearing jams. This smart design minimizes downtime, simplifies routine maintenance, and ensures smooth, reliable operation.

### Smart Automation with Load'n'Go Simplicity

The innovative Load'n'Go functionality simplifies job setup and reduces operator training time. Simply load your documents and envelopes, press start, and the system automatically measures document and envelope sizes to configure the correct settings. This ensures fast, error-free processing with minimal manual intervention.

### Enhanced reading capability

The intimus TSI-4G supports multiple reading technologies, enabling precise document control and secure mailing workflows. It can read: OMR (Optical Mark Recognition) 1D and 2D Barcodes, Data Matrix and QR codes. Codes can be printed anywhere on the document, offering maximum layout flexibility for modern document design and automation requirements.

## Specifications

|                          |                                                  |
|--------------------------|--------------------------------------------------|
| Speed                    | Up to 2500 Env/Hour                              |
| User Interface           | 7" Colour touchscreen                            |
| Document Feeder Capacity | 325                                              |
| Envelope feeder capacity | 150                                              |
| Job Memory               | 50                                               |
| Fold Types               | C / Z / V / double parallel / no fold            |
| Fold Capacity            | 5 doc. in C / 8 doc. in V (80 g/m <sup>2</sup> ) |
| Noise level              | <68,3 dBA                                        |
| Dimensions (HxDxW)       | 1270 x 580/665 x 420 mm                          |
| Weight                   | 72 Kg (Max)                                      |
| Power requirements       | 220-240V, 50/60Hz                                |

## Options

|                                |                   |
|--------------------------------|-------------------|
| Scanning features              | OMR,BCR 1D-2D, QR |
| Maxi-Feeder                    | Yes               |
| High Capacity vertical stacker | Yes               |
| Left or right hand Catch tray  | Yes               |
| Furniture                      | Yes               |

### Why the PaperFolder Co.?

The PaperFolder Company has been in business for over 25 years specializing in folder inserters. We take the time to understand your needs, recommend the right machine, and then get samples to test pre-sale to make sure that it will work properly and to your satisfaction. Our prices normally include onsite setup, training and one year onsite service unless you are in a remote area or for some reason service is not available. At the end of the first year, you can extend the service for a fee. Contact us by phone or email for information, quotes or to answer questions.
