The **FD 574 Cut-Sheet Cutter** is uniquely designed to process forms generated from a digital printer, up to **44 forms per minute**. It automatically feeds the forms and cuts, slits*, or perforates* in the desired position, using **transport rollers** for accuracy and controls for fine-tuning. With a **cutting accuracy of +/- 0.5**, it delivers precise and razor sharp edges on every finished piece, from checks and coupons, to tickets, membership cards and more. **Pre-programmed for six popular paper sizes**, it can also store up to 100 custom jobs. Options include a slitter, perforator, and belt conveyor stacker.

*User-Friendly Control Panel
Provides helpful prompts for effective and efficient operation*

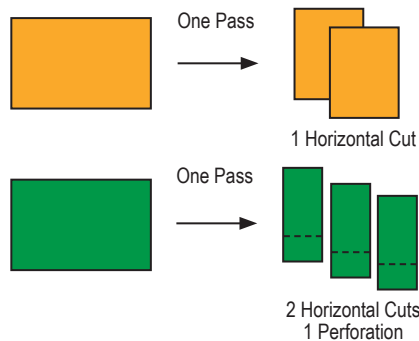

*Top-Loading Feed System
Allows for continuous operation*

*Thickness Selector & Side Guides
Adjustable to provide the most accurate feeding*

*Cut Multiple Forms on the Same Sheet
Cut-sheet forms are automatically cut and stacked in just one or two passes, in addition to optional slitting or perforating*
